SUMMARY

Junior at Georgia Tech studying Computer Engineering, seeking a cybersecurity analyst internship. A highly disciplined and achievement-oriented athlete: NCAA Division I swimmer, top-10 all-time performer in Georgia Tech program history and multiple-time Brazilian junior national champion.

EDUCATION

Georgia Institute of Technology | B.S. Computer Engineering — Cybersecurity & Distributed Systems Concentration
Atlanta, GA • Expected December 2027 • GPA: 3.27 • Dean's List (3 semesters)

Relevant Coursework: Computer Communications; Programming Hardware/Software Systems; Data Structures & Algorithms; Digital System Design; Digital Design Lab; Discrete Mathematics; Statistics & Applications.

In Progress (Fall 2026): Internetwork Security; Introduction to Computer Security; Computer Architecture, Systems & Concurrency.

EXPERIENCE

Information Security Intern | Banco Rendimento
São Paulo, Brazil • July 2026 – Present

- Triage 10–15 alerts and investigations per week within a 12-person security team, correlating logs across Google SecOps SIEM, Datadog, Cisco Umbrella, and Akamai to separate false positives from actionable incidents.
- Executed 3 web application penetration tests with Burp Suite, documenting reproduction steps and remediation guidance.
- Perform forensic analysis on escalated cases and enrich investigations with external OSINT for attacker context.
- Contribute to internal security policy development and control framework documentation.

Cyber Threat Intelligence Intern | KELA
Tel Aviv, Israel (Remote) • May – July 2026

- Reviewed 100+ Telegram channels tied to Brazilian cybercrime over a 7-week engagement, narrowing to 10 high-priority actor channels distributing leaked databases, PIX fraud kits, carding services, and stealer logs.
- Built a categorized threat-actor tracker mapping channel operators and cross-platform footprints; delivered to the intelligence lead and incorporated into client-facing reporting.
- Applied structured discovery across TGStat, Telemetr.io, and lyzem, cross-referencing dark web sources to validate attribution.
- Operated a hardened collection environment (isolated browser, VPN, Tor) in line with internal OPSEC policy.

Security Operations Center (SOC) Intern | Positivo S+
Curitiba, Brazil • June – August 2025

- Triaged 20–30 alerts per shift, analyzing TCP/IP, DNS, and HTTP/HTTPS traffic to identify anomalies and escalate confirmed incidents according to response policy.
- Performed vulnerability assessments with Nmap and Exploit DB, analyzing packet captures in Wireshark to confirm intrusions.
- Investigated authentication and identity alerts, applying cryptography fundamentals to assess credential compromise.
- Partnered with senior analysts to reduce false positives and document repeatable response procedures.

PROJECTS

ML-Powered Malware Analysis Platform | *Python, YARA, Docker, scikit-learn, MITRE ATT&CK • In progress*

- Building an offline triage platform for Windows PE files that combines static analysis, YARA rule matching, MITRE ATT&CK technique mapping, and supervised classification.
- Designed a modular Python pipeline for PE feature extraction and automated classification, containerized in Docker.

Sports Outcome Prediction Engine | *Python, pandas, NumPy, scikit-learn, XGBoost*

- Built end-to-end ML pipelines predicting NBA and FIFA World Cup outcomes, trained on all available historical game data.
- Engineered team- and game-level features and benchmarked multiple model families across training and evaluation runs.

TECHNICAL SKILLS

Security: SOC operations and alert triage, SIEM log correlation, incident response, digital forensics, cyber threat intelligence (CTI), OSINT collection, threat-actor profiling, web application penetration testing, vulnerability assessment, phishing analysis

Tools: Google SecOps SIEM (Chronicle), Datadog, Cisco Umbrella, Akamai, Burp Suite, Wireshark, Nmap, YARA, Exploit DB, TGStat, Telemetr.io, Tor, Docker, Git, Jupyter Notebook

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, TLS, OSI model, traffic and packet analysis, firewall rules, WAF/DNS filtering

Programming: Python (proficient), Java, C, C++, Bash, SQL, REST APIs; JavaScript (basic); Linux, Windows, macOS

Languages: Portuguese (native), English (fluent), Spanish (conversational)

CERTIFICATIONS & ACTIVITIES

Google Cybersecurity Professional Certificate (completed) • **American Red Cross** — CPR, First Aid, AED certified.

NCAA Division I Swimming, Georgia Tech — 12 years competitive; top 6 nationally in Brazil (2023); club captain, 2019–2023.
