SUMMARY

Junior at Georgia Tech studying Computer Engineering, seeking a cybersecurity analyst internship. A highly disciplined and achievement-oriented athlete: NCAA Division I swimmer, top-10 all-time performer in Georgia Tech program history and multiple-time Brazilian junior national champion.

EDUCATION

Georgia Institute of Technology | B.S. Computer Engineering — Cybersecurity & Distributed Systems Concentration
Atlanta, GA • Expected December 2027 (12/27) • GPA: 3.31

Minor in Applications of Artificial Intelligence and Machine Learning

Relevant Coursework: Computer Communications; Computer Architecture, Systems & Concurrency; Programming Hardware/Software Systems; Data Structures & Algorithms; Digital System Design; Discrete Mathematics; Statistics.

In Progress (Fall 2026): Internetwork Security; Introduction to Computer Security.

EXPERIENCE

Information Security Intern | Banco Rendimento
Sao Paulo, Brazil • July – September 2026

- Triaged 10–15 alerts and investigations per week, correlating logs across Google SecOps SIEM, SentinelOne EDR, and Akamai to separate false positives from actionable incidents.
- Executed 3 web application penetration tests with Burp Suite, presenting findings to developers and supporting remediation.
- Maintained and troubleshot Datadog, Cisco Umbrella, and Trellix DLP deployments, resolving configuration and coverage issues.
- Contributed to security policy and control documentation under LGPD and BACEN regulations; helped develop phishing training.

Cyber Threat Intelligence Intern | KELA
Tel Aviv, Israel (Remote) • May – July 2026

- Reviewed 100+ Telegram channels tied to Brazilian cybercrime over a 7-week engagement, narrowing to 10 high-priority actor channels distributing leaked databases, PIX fraud kits, carding services, and stealer logs.
- Built a categorized threat-actor tracker mapping channel operators and cross-platform footprints; delivered to the intelligence lead and incorporated into client-facing reporting.
- Applied structured discovery across TGStat, Telemetr.io, and lyzem, cross-referencing dark web sources to validate attribution.
- Operated a hardened collection environment (dedicated VirtualBox VM, isolated browser, VPN, Tor) per internal OPSEC policy.

Security Operations Center (SOC) Intern | Positivo S+
Uberlandia, Brazil (Remote) • June – August 2025

- Triaged 20–30 alerts per week in IBM QRadar, investigating each to determine whether activity was malicious, resolving non-critical cases independently and escalating critical findings to senior analysts.
- Contacted employees and system owners directly to verify suspicious logins and unexplained log activity before escalating.
- Performed vulnerability assessments with Nmap and analyzed packet captures in Wireshark to confirm or rule out intrusions.
- Partnered with senior analysts to reduce false positives and document repeatable response procedures.

PROJECTS

Voice Deepfake Detection for Brazilian Portuguese | *Python, PyTorch, WavLM, ffmpeg • In progress*

- Trained a WavLM probe reaching 2.6% equal error rate on Portuguese deepfake detection; showed simulated phone-line audio (G.711) raises error 10.3 points on unseen generators, on a zero-persistence pipeline aligned with LGPD.
- Found 4 dataset shortcuts and a bug misaligning 2,481 evaluation clips, and showed a peer-reviewed dataset's published baselines used the wrong sample rate (reproduced the authors' scores exactly, r = 1.000000).

Sports Outcome Prediction Engine | *Python, pandas, NumPy, scikit-learn, XGBoost*

- Built end-to-end ML pipelines predicting NBA and FIFA World Cup outcomes, running 20,000 Monte Carlo simulations.
- Engineered team- and game-level features and benchmarked multiple model families, tuning on probability quality.

TECHNICAL SKILLS

Security: Incident Response, Threat Intelligence (CTI), Detection Engineering, Vulnerability Management, Application Security, SOC Operations and Alert Triage, SIEM Log Correlation, Digital Forensics, and Web Application Penetration Testing.

Tools: Google SecOps SIEM (Chronicle), IBM QRadar, SentinelOne (EDR), Trellix (DLP), Datadog, Cisco Umbrella, Akamai, Burp Suite, Wireshark, Nmap, YARA, OSINT Framework, Tor, Oracle VirtualBox, and Git.

Frameworks: MITRE ATT&CK, NIST CSF, ISO 27001, LGPD (Brazilian data protection), and BACEN (central bank).

Networking: TCP/IP, DNS, HTTP/HTTPS, TLS, Packet Analysis, Firewall Rules, and WAF/DNS Filtering.

Programming: Python, Java, and C (Proficient); C++, Bash, SQL, and JavaScript (Basic).

Systems: macOS and Windows (Proficient); Linux (Basic).

Languages: Portuguese (Native), English (Fluent), Spanish (Conversational).

CERTIFICATIONS & ACTIVITIES

Google Cybersecurity Professional Certificate • American Red Cross — CPR, First Aid, AED certified.

NCAA Division I Swimming, Georgia Tech — 12 years competing; top-6 nationally in Brazil (2023); club captain, 2019–2023.
